

Ecological Footprint Presentation Day

Promoting Ecoliteracy and recognising outstanding school environmental projects

Findon PS. How can you integrate the environment into all of your curriculum?

Findon PS has developed a range of integrated environment units over four years and in 2005 the schools entire teaching program will be based on environmental themes. Jen Clarke and Ian Jones will outline the policies, practices, experiences and curriculum units that have elevated Ecoliteracy as a key successful element of Findon's school program.

Geelong East PS. Student leadership in implementing environment programs.

In 2004 Geelong East created a wide ranging plan to become a sustainable school. One of the key focuses on achieving this outcome has been developing students as school environmental leaders to improve their ecological footprint – with exceptional results.

Creating an environmental buzz – in secondary schools.

Teachers and students from Gilmore College for girls and McKillop College have been developing and implementing environment programs to reduce their ecological footprint – in particular those huge winter heating bills. How have they done it?

EcoLiteracy in 2005. The Decade for Sustainable Education begins in 2005. From 9.00 until 11.30 our teacher PD will focus on the Findon case study and your experiences in making a sustainable lifestyle the focus of our future.

Inspiring School presentations, Environmental Stalls and great networking!

(There is still an opportunity for your schools stand !)

When:
Friday 15th October
8.30 am – 3.00 pm
Where:
Melbourne Water Discovery Centre New Farm Rd Werribee (Mel 205 E12)
Cost
\$50 (Concessions available)
